Skopje, 3.IV.1955.

Professor Joshua Lederberg
Dep.of Genetics, University of Wisconsin
Madison 6, Wisconsin, U.S.A.

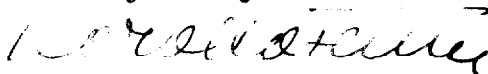

Dear Professor Lederberg,

when I came back a while ago from Switzerland, I received your kind letter of 12.II.1955. and I thank you for it as well as for the interest you showed for my paper. I therefore enclose the reprint for which you've asked.

Being interested in the strains of pathogenic E. coli which we have isolated here, I send it enclosed by a separate post. Next summer when they'll get more - I'll gladly send all the rest which we're going to isolate.

I from my part would be obliged if you in turn send me the reprints of your works as well as the ones of your co-workers on Enterobacteriaceae.

Very Truly Yours

(Prof. Dr. Bogdan Karakašević)
